**S**ELECTION of the full-color photogravures in this portfolio was made with the desire to depict a few of the pleasing treatments that may be accorded a home thru the use of WEATHERBEST Stained Shingles. It has also been our wish to show how extensively WEATHERBEST has assisted in making these homes expressive of the individuality of architect and owner.

The art of reproduction in natural colors has retained in each of these pictures wonderful faithfulness of detail and portrayed the charming texture of shingles and color.

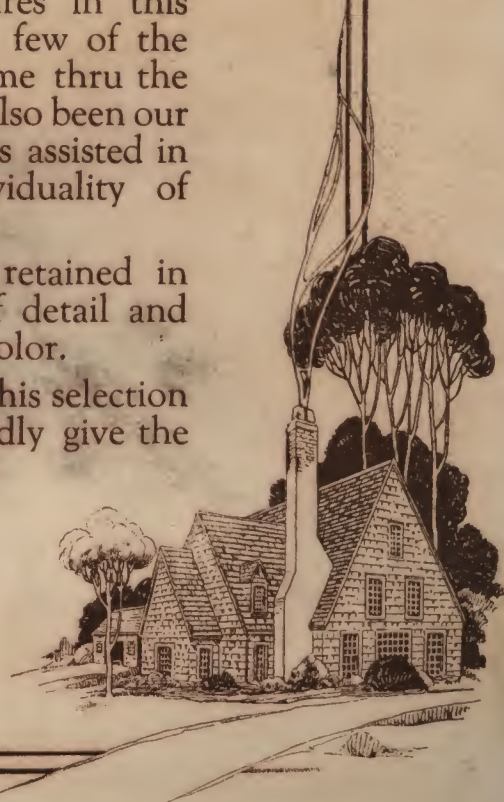

Should extra copies be desired of any pictures in this selection we will gladly send them without charge. Kindly give the number shown on margin of each photo when requesting additional prints.

**P**ATERNED after the old thatched straw roofs of England, this roof of WEATHERBEST Thatched Effect Stained Shingles afforded the opportunity to secure the quaintness that characterized those old roofs of straw. This charming home was designed by Architects M. M. Miley and Leo Croell for Mr. A. G. Sharp, President of the A. G. Sharp Lumber Company, Youngstown, Ohio. A medium brown was selected as the color treatment. On the other side of this picture will be found the floor plans of this home.

**T**N Elyria, Ohio stands this delightful home owned by Mr. C. A. Person of the West Side Lumber & Coal Co. Of English Style in architecture, the popular 24-in. WEATHERBEST Stained Shingles in Colonial White laid with wide exposure give decided contrast to the roof of Moss Green WEATHERBEST Stained Shingles yet retain a marked softness in tone. Plans showing arrangement of rooms are reproduced on the reverse side of this picture. Note convenience of garage—a popular idea in present day design.

**H**“home” in every sense of the word best describes this inviting residence of Mr. G. W. Borthwick at Syracuse, N. Y. Architect James D. Meehan has secured remarkable effects with a WEATHERBEST Stained Shingles 24-in. long on sidewalls stained a rich gray and laid with a 10-in. exposure. The roof is designed to contrast by the use of 24-in. length in Variegated shades of Brown laid with 7½-in. exposure. Thru the courtesy of Mr. Meehan we have reproduced the floor plans on the reverse side.

ONE of the beautiful homes built by the L. George Horowitz Co. on the Hadley Estate at Englewood, N. J. The WEATHERBEST Weathered Straw Thatch Effect Roof imparts a colorful touch, while the irregularity of the thatch butts and softness of rolled rakes and eaves, makes the roof one of the chief decorative features of the building. Architect B. Halstead Shepard also specified 18-in. WEATHERBEST Stained Shingles in Gray for the sidewalls.

**THE WEATHERBEST** Stained Shingle home seems always to possess an individuality that readily sets it apart. This home of Mr. John Wise at Relay, near Baltimore, Md. was judged the best small home for its price among those entered in a recent contest. The roof of 16-in. **WEATHERBEST** Stained Shingles in Green harmonizes well with the sidewalls of 18-in. in Gray. Floor plans of this home will be found reproduced on the other side.

**A**RCHITECT Stanton P. Lee has secured unusual values in this selection of WEATHERBEST Stained Shingles for the residence of A. E. Van Devort at Troy, N. Y. On the sidewalls, laid 10-in. to the weather, 24-in. WEATHERBEST in Colonial White lend charming contrast with the rather unusual expanse of roof. The stained shingles on the roof are 16-in. WEATHERBEST "Double-Thick". The heavy butts of these shingles look especially well with this style of architecture.

**D**EPARTING from the conventional straight lines and color, Edwin H. Silverman of the Architectural firm Edwin H. Silverman—Abraham Levy, Philadelphia, Pa., used WEATHERBEST Semi-Thatch Stained Shingles in a daring but pleasing color treatment on the roof of his residence at Elkins Park, Pa. The many standard colors in which WEATHERBEST Stained Shingles are furnished and varied styles of laying on roof or sidewalls provide an unlimited field for the mind of creative tendency. Floor plans on reverse side.

**C**OULD house and surroundings have grown up together it is indeed doubtful if a more perfect degree of naturalness would have resulted than was achieved by the Builders Service Company in the use of **WEATHERBEST Stained Shingles** for the roof and sidewalls of Mr. Walter Winslow's home at Minneapolis, Minn. The design is by the Architect's Small House Service Bureau of the United States, Inc. Plan No. 6-A-37. Blue-prints showing arrangement of rooms are reproduced on the reverse of this picture.
